DESCRIPTION

BITUMAT CONCRETE PRIMER is a cold applied general purpose roofing primer formulated with highly pliable, flexible bitumen, select petroleum solvents and compounded with wetting and saturation additives.

USES

BITUMAT CONCRETE PRIMER is suitable for concrete, smooth asphalt roofs, brick and metal surfaces, used as the prime coat prior to installation of any BITUMAT membranes.

OUTSTANDING FEATURES

- Select solvent allows for optimum penetration of BITUMAT CONCRETE PRIMER into the surface pores, pin holes and cracks.
- Absorbs the existing dust and scale thus prevents the formation of additional dust and scale.
- The resulting surface permits the proper bonding of self adhesive as well as torchable membranes, in addition to any other bituminous adhesives and coatings.

APPLICATION

The surface must be thoroughly cleaned, and all dust, dirt, loose coatings, oil or greasy substances removed, concrete must be completely cured, and dried prior to priming. BITUMAT CONCRETE PRIMER should be allowed to dry before application of subsequent layers.

It can be applied with a roofing brush, roller, squeegee, or airless spray equipment at the recommended coverage rate.
